
What are national development priorities and how do they link to climate change and adaptation / mitigation?

- Poverty alleviation
 - Energy security
 - Infrastructure
 - Health
 - Increase prosperity, quality of life and human well being
 - Sustainable livelihoods
-

What lessons can be learned for national policy that delivers climate benefits and is compatible with development objectives?

- Much potential for mainstreaming
 - Awareness and political will needed to recognise the co benefits
-

What are the key issues for adaptation and mitigation?

- Mainstreaming overload
 - Awareness
 - Political commitment
 - Institutional framework
 - Scientific uncertainties on climate change
 - Shifting (inter)national investments and finance directions
 - Moving from examples to structural approaches
-

What are the key issues for reducing vulnerability to climate change?

- Start pragmatically
 - Enhancing awareness on benefits of adaptation policies (see Tanzania, climate sensitive economy)
-

What are the key issues for limiting
GHG emissions?
